

ANTONIO RUIZ

Gurabo, Puerto Rico | pishacharuiz@gmail.com | 787 513 4009 | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Governance, Risk, and Compliance (GRC) and Security Automation Engineer specializing in compliance-as-code, multi-framework mapping (NIST SP 800-53, NIST AI RMF, Secure Controls Framework), and automated policy enforcement. Proven expertise in bridging technical system architecture with regulatory frameworks, building Python-based auditing tools and Open Policy Agent (OPA/Rego) CI/CD guardrails to eliminate manual administrative overhead and enforce continuous compliance.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Security & AI Frameworks:** Secure Controls Framework (SCF 2026), NIST SP 800-53 (Low/Mod/High), FedRAMP, NIST AI RMF, ISO/IEC 42001, NIST CSF 2.0.
- **Governance & Automation:** Compliance-as-Code, Policy-as-Code, AI Risk Management & Asset Inventories, Multi-Framework Harmonization ("Map Once, Comply Many").
- **Cloud & Infrastructure:** AWS (IAM, S3, CloudTrail), CI/CD Pipelines, Linux System Administration, Git / GitHub.
- **Tools & Technologies:** Python, Open Policy Agent (OPA/Rego), JSON Parsing, Unit Testing (unittest), Eramba, Splunk, VS Code.

TECHNICAL PROJECTS & ENGINEERING LABS

AWS S3 Compliance-as-Code Automation Framework

- Engineered a modular Python-based compliance automation tool to programmatically evaluate infrastructure state JSON payloads against strict regulatory baselines.
- Mapped automated audit rules directly to NIST SP 800-53 SC-13 (Cryptographic Protection) and AC-3 / SC-7 (Access Enforcement and Public Access Controls).
- Integrated structured unit testing (unittest) and automated remediation logging pipelines to ensure reliable detection of non-compliant cloud assets.

SCF Governance & AI Policy-as-Code Implementation Lab

- Architected a comprehensive multi-framework mapping system utilizing the Secure Controls Framework (SCF) to harmonize governance requirements across NIST CSF 2.0, ISO 27001, and SOC 2, leveraging "Map Once, Comply Many" evidence efficiency (E-IAM-05/06).
- Developed automated Open Policy Agent (OPA/Rego) CI/CD guardrails to programmatically enforce AI governance controls (SCF AAT-02/AAT-04 and NIST AI RMF), blocking unverified high-risk model deployments missing mandatory output filters, encryption, or designated human reviewers.

PROFESSIONAL EXPERIENCE

Micheo Music

2014 – 2023

Operations & Technical Project Manager

- Directed multi-year project lifecycles, complex operational workflows, and technical client support initiatives with a strict focus on quality assurance.
- Maintained meticulous documentation standards and systematic organization to support fast-paced production and coordination deliverables.

**CenterWell Pharmacy (Conduent) / Telecontacto Contact Center
Client Relations & Regulatory Compliance Specialist**

- Administered high-tier technical support and validated complex data pipelines, ensuring strict adherence to healthcare and corporate compliance parameters.
- Managed high-priority technical escalations, systematically diagnosed system anomalies, and maintained full compliance with institutional security and data privacy policies.

| EDUCATION & CERTIFICATIONS

Associate's Degree in Computer Programming – IBC

Associate's Degree in Music Education – Inter American University of Puerto Rico

Certifications: GRC Fundamentals, SAP GRC Essentials, ISO 27001 ISMS, Simply Cyber GRC Analyst Masterclass
